

# Workshop

## Unconscious Bias

Siara Isaac, EPFL's Center for Learning Sciences

Unconscious biases can subtly affect our social interactions and decision-making. Join our workshop led by EPFL's Siara Isaac and learn about these hidden stereotypes and prejudices.

Through interactive sessions like implicit association tests and role-plays, participants will understand their biases and learn inclusive team work strategies.

This workshop is an opportunity to not just enhance awareness, but also to drive cultural change and foster diversity. We invite you to participate in this transformational learning experience.
